APPROVED JURISDICTIONAL DETERMINATION FORM U.S. Army Corps of Engineers

| SECTION I: BACKGROUND IN | IFORMATION |
|---|--|
| A. REPORT COMPLETION DATE FOR | APPROVED JURISDICTIONAL DETERMINATION (JD): 07-Apr-2008 |
| B. DISTRICT OFFICE, FILE NAME, AND | NUMBER: Walla Walla District, NWW-2007-01344-B03-JD1 |
| C. PROJECT LOCATION AND BACKGR | ROUND INFORMATION: |
| State : | ID - Idaho |
| County/parish/borough: | Canyon |
| City: | Star |
| Lat: | 43.700265167764 |
| Long: | -116.512456221456 |
| Universal Transverse Mercator | Folder UTM List UTM list determined by folder location |
| | NAD83 / UTM zone 38S |
| | Waters UTM List UTM list determined by waters location |
| | NAD83 / UTM zone 38S |
| Name of nearest waterbody: | US Ditch |
| Name of nearest Traditional Navigable V | |
| Name of watershed or Hydrologic Unit C | ode (HUC): 17050114 |
| ✓ | |
| | nd/or potential jurisdictional areas is/are available upon request. |
| | |
| Check if other sites (e.g. offsite mitigati | on sites, disposal sites, etc¿) are associated with the action and are recorded on a different JD form. |
| Check if other sites (e.g., onsite mingan | on sites, disposal sites, closs, are associated with the action and are recorded on a different objection. |
| D. REVIEW PERFORMED FOR SITE EV | 'ALUATION: |
| 07-Apr-20 | 108 |
| Office Determination Date: | 100 |
| | |
| Field Determination Date(s): | |
| | |
| SECTION II. SUMMADY OF FI | NDINCC |
| SECTION II: SUMMARY OF FI | NDING5 |
| A. RHA SECTION 10 DETERMINATION | OF JURISDICTION |
| There [] "navigable waters of the U.S." v | within Rivers and Harbors Act (RHA) jurisdiction (as defined by 33 CFR part 329) in the review area. |
| | |
| | |
| Waters subject to the ebb and f | ow of the tide. |
| | |
| Waters are presently used, or h | ave been used in the past, or may be susceptible for use to transport interstate or foreign commerce. |
| Explain: | |
| B. CWA SECTION 404 DETERMINATIO | N OF JURISDICTION. |
| | ean Water Act (CWA) jurisdiction (as defined by 33 CFR part 328) in the review area. |
| | (2007) Januarianan (da damina ay ad on to part obay in the fortion area. |
| | |
| Waters of the U.S. Indicate presence of waters of U.S. i | n review area:1 |
| Water Name | Water Type(s) Present |
| | Relatively Permanent Waters (RPWs) that flow directly or indirectly into TNWs |
| 07-1344-B03, Site No. 1 07-1344-B03, Site No. 2 | Relatively Permanent Waters (RPWs) that flow directly or indirectly into TNWs Relatively Permanent Waters (RPWs) that flow directly or indirectly into TNWs |
| 07-1344-B03, Site No. 3 | Relatively Permanent Waters (RPWs) that flow directly or indirectly into TNWs |

b. Identify (estimate) size of waters of the U.S. in the review area:

Area: (m²) Linear: (m)

c. Limits (boundaries) of jurisdiction:

| based on: [] OHWM Elevation: (if known) | | | | | | |
|--|------------------------|--------------------|----------------------|---|-------------|------------|
| 2. Non-regulated waters/wetlands: ³ | | | | | | |
| Potentially jurisdictional waters and/or | wetlands were | assessed within t | he review area and o | determined to be not jurisdictional. Expl | ain: | |

Tributary (conditions, stability, presence, geometry, gradient):

| Tributary Name | Condition\Stability | Run\Riffle\Pool Complexes | Geometry | Gradient (%) |
|-------------------------|---|---------------------------|---------------------|--------------|
| 07-1344-B03, Site No. 1 | Stable. Maintained by Irrigation District | N/A | Relatively straight | - |
| 07-1344-B03, Site No. 2 | - | - | Relatively straight | - |
| 07-1344-B03, Site No. 3 | Stable. Maintained by Irrigation Drainage District. | N/A | Relatively straight | - |

(c) Flow:

| Tributary Name | Provides for | Events Per Year | Flow Regime | Duration & Volume |
|-------------------------|---------------|-----------------|--|-------------------|
| 07-1344-B03, Site No. 1 | Seasonal flow | 1 | Controlled by a series of irrigation headgates. | - |
| 07-1344-B03, Site No. 2 | Seasonal flow | 1 | Water controlled by a series of diversions and irrigation headgates. | - |
| 07-1344-B03, Site No. 3 | Seasonal flow | 1 | Controlled by a series of irrigation diversions and headgates. | - |

Surface Flow is:

| Tributary Name | Surface Flow | Characteristics |
|-------------------------|--------------|-----------------|
| 07-1344-B03, Site No. 1 | Confined | - |
| 07-1344-B03, Site No. 2 | Confined | - |
| 07-1344-B03, Site No. 3 | Confined | - |

Subsurface Flow:

| Tributary Name | Subsurface Flow | Explain Findings | Dye (or other) Test |
|-------------------------|-----------------|------------------|---------------------|
| 07-1344-B03, Site No. 1 | - | - | - |
| 07-1344-B03, Site No. 2 | - | - | - |
| 07-1344-B03, Site No. 3 | - | - | - |

Tributary has:

| Tributary Name | Bed & Banks | онwм | Discontinuous OHWM ⁷ | Explain |
|-------------------------|-------------|------|------------------------------------|---------|
| 07-1344-B03, Site No. 1 | - | Х | - | - |
| 07-1344-B03, Site No. 2 | - | Х | - | - |
| 07-1344-B03, Site No. 3 | - | Х | - | - |

Tributaries with OHWM⁶ - (as indicated above)

| Tributary Name | онwм | Clear | Litter | Changes in Soil | Destruction Vegetation | Shelving | Wrack Line | Matted\Absent Vegetation | Sediment Sorting | Leaf Litter | Scour | Sediment Deposition | Flow Events | Water Staining | Changes Plant | Other |
|----------------------------|------|-------|--------|-----------------|---------------------------|----------|------------|-----------------------------|---------------------|-------------|-------|------------------------|-------------|-------------------|------------------|-------|
| 07-1344-B03, Site No. 1 | х | х | Х | - | - | - | Х | - | - | х | - | - | Х | х | - | - |
| 07-1344-B03, Site No. 2 | х | Х | Х | - | - | - | Х | - | х | Х | - | Х | Х | х | - | - |
| 07-1344-B03, Site No. 3 | х | х | х | - | - | - | х | - | х | х | - | Х | - | Х | - | - |

If factors other than the OHWM were used to determine lateral extent of CWA jurisdiction:

High Tide Line indicated by:

Not Applicable.

Mean High Water Mark indicated by:

Not Applicable.

(iii) Chemical Characteristics:
Characterize tributary (e.g., water color is clear, discolored, oily film; water quality;general watershed characteristics, etc.).

| Tributary Name | Explain | Identify specific pollutants, if known |
|-------------------------|---------|--|
| 07-1344-B03, Site No. 1 | - | - |
| 07-1344-B03, Site No. 2 | - | - |
| 07-1344-B03, Site No. 3 | - | - |

(iv) Biological Characteristics. Channel supports:

| Tributary Name | Riparian Corridor | Characteristics | Wetland Fringe | Characteristics | Habitat |
|-------------------------|-------------------|-----------------|----------------|-----------------|---------|
| 07-1344-B03, Site No. 1 | - | - | - | - | - |
| 07-1344-B03, Site No. 2 | - | - | - | - | - |
| 07-1344-B03, Site No. 3 | = | - | - | - | - |

2. Characteristics of wetlands adjacent to non-TNW that flow directly or indirectly into TNW

(i) Physical Characteristics:

(a) General Wetland Characteristics:

Properties:

Not Applicable.

(b) General Flow Relationship with Non-TNW:

Flow is:

Not Applicable.

Surface flow is:

Not Applicable.

Subsurface flow:

Not Applicable.

(c) Wetland Adjacency Determination with Non-TNW:

Not Applicable.

(d) Proximity (Relationship) to TNW:

Not Applicable.

(ii) Chemical Characteristics:

Characterize tributary (e.g., water color is clear, discolored, oily film; water quality; general watershed characteristics, etc.).

Not Applicable.

. rot / ipp..oab.o.

(iii) Biological Characteristics. Wetland supports:

Not Applicable.

3. Characteristics of all wetlands adjacent to the tributary (if any):

All wetlands being considered in the cumulative analysis:

Not Applicable.

Summarize overall biological, chemical and physical functions being performed:

Not Applicable.

C. SIGNIFICANT NEXUS DETERMINATION

A significant nexus analysis will assess the flow characteristics and functions of the tributary itself and the functions performed by any wetlands adjacent to the tributary to determine if they significantly affect the chemical, physical, and biological integrity of a TNW. For each of the following situations, a significant nexus exists if the tributary, in combination with all of its adjacent wetlands, has more than a speculative or insubstantial effect on the chemical, physical and/or biological integrity of a TNW. Considerations when evaluating significant nexus include, but are not limited to the volume, duration, and frequency of the flow of water in the tributary and its proximity to a TNW, and the functions performed by the tributary and all its adjacent wetlands. It is not appropriate to determine significant nexus based solely on any specific threshold of distance (e.g. between a tributary and its adjacent wetland or between a tributary and the TNW). Similarly, the fact an adjacent wetland lies within or outside of a floodplain is not solely determinative of significant nexus.

Significant Nexus: Not Applicable

D. DETERMINATIONS OF JURISDICTIONAL FINDINGS. THE SUBJECT WATERS/WETLANDS ARE:

1. TNWs and Adjacent Wetlands:

Not Applicable.

2. RPWs that flow directly or indirectly into TNWs:

| z. Kr ws that now directly of indirectly into Trews. | | | | |
|--|----------|---|--|--|
| Wetland Name | Flow | Explain | | |
| 07-1344-B03, Site No. 1 | SEASONAL | In the Treasure Valley, irrigation season typically starts on April 15 and ends on October 15. This irrigation facility has a surface connection to the Boise River through a series of irrigation lateral and canals. | | |
| 07-1344-B03, Site No. 2 | SEASONAL | In the Treasure Valley, irrigation season starts on April 15 and end on October 15, annually. In this area, the irrigation ditches eventually flow to a series of irrigation laterals and canals. Water eventually returns to the Boise River. | | |
| 07-1344-B03, Site No. 3 | SEASONAL | In the Treasure Valley, irrigation season typically starts on April 15 and ends on October 15, annually. Irrigation ditches in the vicinity of this project typically return water back into the Boise River by way of a series of named and unnamed laterals and canals. | | |

Provide estimates for jurisdictional waters in the review area:

| Wetland Name | Туре | Size (Linear) (m) | Size (Area) (m²) |
|-------------------------|---|-------------------|------------------|
| 07-1344-B03, Site No. 1 | Relatively Permanent Waters (RPWs) that flow directly or indirectly into TNWs | 6.096 | - |
| 07-1344-B03, Site No. 2 | Relatively Permanent Waters (RPWs) that flow directly or indirectly into TNWs | 43.8912 | - |
| 07-1344-B03, Site No. 3 | Relatively Permanent Waters (RPWs) that flow directly or indirectly into TNWs | 341.376 | - |
| Total: | | 391.3632 | 0 |

| 07-1344-b03, Site No. 3 | Relatively Fermanient Waters (RFWs) that now directly of indirectly into TNWs | 341.370 | _ - | |
|--|--|----------------------------|----------------------|------|
| Total: | | 391.3632 | 0 | |
| 3. Non-RPWs that flow directly Not Applicable. | or indirectly into TNWs: ⁸ | | | |
| Provide estimates for jurisdicti Not Applicable. | ional waters in the review area: | | | |
| 4. Wetlands directly abutting at Not Applicable. | n RPW that flow directly or indirectly into TNWs. | | | |
| Provide acreage estimates for Not Applicable. | jurisdictional wetlands in the review area: | | | |
| 5. Wetlands adjacent to but not Not Applicable. | t directly abutting an RPW that flow directly or indirectly into TNWs: | | | |
| Provide acreage estimates for Not Applicable. | jurisdictional wetlands in the review area: | | | |
| 6. Wetlands adjacent to non-RF Not Applicable. | PWs that flow directly or indirectly into TNWs: | | | |
| Provide estimates for jurisdicti Not Applicable. | onal wetlands in the review area: | | | |
| 7. Impoundments of jurisdictio Not Applicable. | nal waters: ⁹ | | | |
| E. ISOLATED [INTERSTATE OF INTERSTATE COMMERCE, INCOMMERCE, INCOMMERCE, INCOMMERCE, INCOMPRESSION OF THE PROPERTY OF THE PROPE | R INTRA-STATE] WATERS INCLUDING ISOLATED WETLANDS, THE USE, DEGRADATIC CLUDING ANY SUCH WATERS: ¹⁰ | ON OR DESTRUCTION OF | WHICH COULD AF | FECT |
| Identify water body and summa Not Applicable. | arize rationale supporting determination: | | | |
| Provide estimates for jurisdicti Not Applicable. | ional waters in the review area: | | | |
| F. NON-JURISDICTIONAL WAT | ERS. INCLUDING WETLANDS | | | |
| If potential wetlands were asses Regional Supplements: | ssed within the review area, these areas did not meet the criteria in the 1987 Corps of Engine | ers Wetland Delineation Ma | anual and/or appropr | ate |
| Review area included isolated v | waters with no substantial nexus to interstate (or foreign) commerce: | | | |
| Prior to the Jan 2001 Supreme | Court decision in "SWANCC," the review area would have been regulated based soley on the | "Migratory Bird Rule" (MBI | R): | |
| Waters do not meet the "Signific | cant Nexus" standard, where such a finding is required for jurisdiction (Explain): | | | |
| Other (Explain): | | | | |
| (=/k/m//) | | | | |

Provide acreage estimates for non-jurisdictional waters in the review area, where the sole potential basis of jurisdiction is the MBR factors (ie., presence of migratory birds, presence of endangered species, use of water for irrigated agriculture), using best professional judgment:

Not Applicable.

Provide acreage estimates for non-jurisdictional waters in the review area, that do not meet the "Significant Nexus" standard, where such a finding is required for jurisdiction.

Not Applicable.

SECTION IV: DATA SOURCES.

A. SUPPORTING DATA. Data reviewed for JD

(listed items shall be included in case file and, where checked and requested, appropriately reference below): Not Applicable.

B. ADDITIONAL COMMENTS TO SUPPORT JD:

Not Applicable.

¹-Boxes checked below shall be supported by completing the appropriate sections in Section III below.

²⁻For purposes of this form, an RPW is defined as a tributary that is not a TNW and that typically flows year-round or has continuous flow at least "seasonally" (e.g., typically 3 months).

 $^{^{3}\}mbox{-Supporting}$ documentation is presented in Section III.F.

⁴⁻Note that the Instructional Guidebook contains additional information regarding swales, ditches, washes, and erosional features generally and in the arid West.

⁵-Flow route can be described by identifying, e.g., tributary a, which flows through the review area, to flow into tributary b, which then flows into TNW.

⁶⁻A natural or man-made discontinuity in the OHWM does not necessarily sever jurisdiction (e.g., where the stream temporarily flows underground, or where the OHWM has been removed by development or agricultural practices). Where there is a break in the OHWM that is unrelated to the waterbody's flow regime (e.g., flow over a rock outcrop or through a culvert), the agencies will look for indicators of flow above and below the break.

⁷-Ibid.

⁸⁻See Footnote #3.

 $^{^{\}rm 9}$ -To complete the analysis refer to the key in Section III.D.6 of the Instructional Guidebook.

¹⁰-Prior to asserting or declining CWA jurisdiction based solely on this category, Corps Districts will elevate the action to Corps and EPA HQ for review consistent with the process described in the Corps/EPA Memorandum Regarding CWA Act Jurisdiction Following Rapanos.
